

LADYBUG GARDEN PEBBLES

You can use acrylic paints for this art project to make them last longer, and apply a seal of clear acrylic gloss if they are going out into the garden. These pebbles make perfect Mother's Day gifts; supply a whole pile of pebbles so your students can get creative, and then put several of their creations in a little basket for their gifts to take home. A ladybug, a bumblebee, a caterpillar, or an ant all make perfect candidates for these pebbles. You can use only part of the pebble face as this student did, allowing her to add legs, wings, etc., or coat the entire pebble with paint and simply draw on the body.
